STATINTL

MEMORANDUM FOR: [REDACTED] Executive Secretary
Suggestion and Achievement Awards Committee

SUBJECT : Warning Signs at Elevators

REFERENCE : Suggestion 76-261

1. The Fine Arts Commission opposes the proliferation of signs of various kinds for various purposes in Agency buildings. We believe that they not only add visual clutter and detract from the general appearance of the public areas in Agency buildings, but we are convinced that few achieve the purposes for which they are intended. STATINTL

2. It is true that the Commission's guiding document, HR [REDACTED] states that the Commission "is concerned particularly with the aspects of public areas in the Headquarters Building". This does not in our view place Agency building and grounds other than Headquarters outside the purview of the Commission, as suggested in [REDACTED] transmittal note of 3/29/76. STATINTL

3. Aside from the visual aspects of the matter, the logic of the suggestion eludes us. It would seem that the highest degree of safety in Agency buildings in the event of fire will not rest upon the existence of signs telling people what to do and what not to do, but upon everyone knowing in advance what to do and having practiced it, plus monitors or wardens properly stationed to make sure procedures are followed. STATINTL

STATINTL

MEMORANDUM FOR: [REDACTED] Exec Secretary, SAAC

SUBJECT : Warning Signs at Elevators

REFERENCE : Suggestion 76-261

1. The FAC opposes the proliferation of signs of various kinds for various purposes in Agency buildings. We believe that they not only add visual clutter and detract from the general appearance of the public areas in Agency buildings, but we are convinced that few achieve the purposes for which they are intended.

STATINTL

2. It is true that the Commission's guiding document, HP [REDACTED] states that the Commission "is concerned particularly with the visual aspects of public areas in the Headquarters Building". This does not in our view place Agency building and grounds other than Headquarters outside the purview of the Commission, as suggested in [REDACTED] transmittal note of 3/29/76.

STATINTL

3. Aside from the visual aspects of the matter, *the logic of the suggestion eludes us.* It would seem *to me* that the highest degree of safety in Agency buildings in the event of fire will not rest upon the existence of signs telling people what to do and what not to do. *But* rather, ~~maximum safety would depend upon everyone knowing in advance what to do and having practiced it and I should think, monitors or wardens properly stationed to make sure proper procedures are followed. A possible device to prevent use of elevators in case of fire would be for them to be programmed so that at the sounding of a fire alarm all elevators would immediately descend to the ground floor, the doors open and remain open until reset.~~

TO: Executive Secretary
Suggestion Awards Committee

SUGGESTION NO.

76-261

SUSPENSE DATE

INSTRUCTIONS: Please complete this form in detail to guide the Suggestion Awards Committee in making a final determination of the merits of this suggestion. Retain third copy.

1. ACTION RECOMMENDED ☒ ADOPT ☐ DECLINE ☐ OTHER (Specify):

2. REASONS FOR RECOMMENDATION (If more space is needed, use plain paper)

The Safety Branch is entirely in support of an award for the suggester; in fact, Key Building went along the same line and installed their warning signs outside prior to the suggestion.

3. TANGIBLE FIRST-YEAR SAVINGS (Man-hours, material, equipment, etc.)

4. INTANGIBLE BENEFITS (See guide on reverse side of third copy)

5. WHAT OTHER OFFICES, DIVISIONS, ETC. MIGHT ALSO USE THIS IDEA?

1. ACTION RECOMMENDED ☒ ADOPT ☐ DECLINE ☐ OTHER (Specify):

2. REASONS FOR RECOMMENDATION (If more space is needed, use plain paper)

Warning signs for personnel not to use the elevators in case of fire were placed inside of the elevators. Of course, in order to read the signs one had to enter the elevator, face the control switches, and then it was too late.

[REDACTED] simple suggestion to place the warning signs outside of the elevators was immediately implemented by the NPIC Safety Officer.

The NPIC Panel feels that this common sense suggestion results in moderate/extended safety benefits to all [REDACTED] tenants as well as to visitors. It is recommended that [REDACTED] be given a \$100 intangible award.

3. TANGIBLE FIRST-YEAR SAVINGS (Man-hours, material, equipment, etc.)

NA

4. INTANGIBLE BENEFITS (See guide on reverse side of third copy)

Moderate/Extended - \$100 Intangible Award

TITLE OR SUBJECT OF SUGGESTION Fire Warning Signs For [REDACTED] Elevators	SUGGESTION NO. 76-261
<p>PRESENT METHOD</p> <p>The present method of warning personnel not to use the elevators in case of fire consist of signs on the inside of the elevators. These signs cannot be read without first entering the elevators.</p>	
<p>SUGGEST</p> <p>I suggest that these signs be placed on the outside in front of the elevators. This will allow building personnel to read the warning signs before entering the elevators. (This suggestion has already been implemented.)</p>	
<p>ADVANTAGES</p> <p>The advantage is building personnel will not be trapped inside the elevators while reading the signs warning them not to use in case of fire.</p>
